

## Aspect COMPACT Preclinical MRI

Aspect Imaging is the world's leader in compact, high-performance MRI systems

**Powerful results without the cost**

### Product Benefits

- Superb Images
- No cryogenes
- Uses permanent magnet
- Less footprint
- Safe-no stray field
- Simple to operate
- Affordable
- Ready for imaging from day one
- No dedicated housing facilities
- Dedicated technician is not needed
- Low maintenance
- Lowest power consumption in the industry

The world's first complete and most cost-effective permanent magnet simultaneous PET/MRI solution for preclinical research

### Package Includes

- Compact MRI System
- Fully Integrated Animal Handling System
- Heated water circulator pump
- Physiological Monitoring System
- Isoflurane-based anesthesia system
- Ready-to-use straight out of the box
- Solution to wide preclinical research needs and multiple applications

M7™ compact cost-effective MRI system dedicated for imaging of mice and rats

### One Instrument, Multiple Applications

- Cancer
- Cardiovascular
- Contrast-based Molecular Imaging
- Diabetes and Obesity
- Embryology/Developmental Biology
- Nephrology
- Neurobiology
- StemCell / Cell Tracking
- Histology
- Bioluminescence Imaging
- Simultaneous PET MRI

M3™ compact cost-effective MRI system dedicated for imaging of mice
